I express my gratitude to my advisor, David, who introduced me to research in economics, passing onto me all his passion and interests all the moment. This thesis would have not been written without his incessant support and motivation.

I would like to thank my Ph.D. colleagues of the IDEA program. In particular Andrés, Antonio, Bea, Cati, David, Gustavo and Irene. I shared with them the period of hard-studying but also many joyful moments. I would also like to thank Inés, Mercè and all the other “inhabitants” of the Departament d'Economia i d'Història Econòmica I had the luck of meeting.

Finally, I thank my parents for their constant encouragement and patience throughout the years.
