

ANNEX 14.2

Assignacions de capítols a clusters fixant la grandària dels clusters.

En aquest annex hi ha l'assignació dels capítols a un dels dos grups obtinguts de les anàlisi cluster realitzades imposant que la grandària del cluster *del final* sigui 100, en els capítols anteriors, per a la llargada de paraula, l'ús de 36 lletres, de 5 vocals, de les 12 i 25 paraules més freqüents i de les paraules discriminants, i per la diversitat de vocabulari. Codifiquem, per cadascuna de les set anàlisis realitzades, amb 0 els capítols assignats al cluster que conté majoritàriament els capítols del principi del llibre, i amb 1 els assignats al cluster que conté majoritàriament els capítols del final i que anomenem cluster *del principi* i *del final*, respectivament. La columna etiquetada com **S7** conté la suma de les set columnes anteriors, de manera que un capítol que té 0 en aquesta columna ha estat assignat en les set anàlisis al cluster *del principi*, un capítol que té 1 en aquesta columna ha estat assignat en sis de les set anàlisis al cluster *del principi* i en una al *del final*, mentre que un capítol que té 7 en aquesta columna ha estat assignat en les set anàlisis al cluster *del final*. La columna **S3** correspon a la suma dels resultats de l'anàlisi cluster per llargada de paraula, paraules discriminants i diversitat i la columna **S5** a la suma de **S3** amb els resultats obtinguts per l'ús de les 12 i de les 25 paraules més abundants.
