

TESI DOCTORAL

**CARACTERITZACIÓ DE LA RESPOSTA DE CÈL·LULES
TUMORALS A LES MITRAMICINES**

Marc Bataller Chardi
Barcelona, maig de 2009

ANNEX.

Bataller, M., Portugal, J.

Apoptosis and cell recovery in response to oxidative stress in p53-deficient prostate carcinoma cells.

Arch. Biochem. Biophys. 437, 151-158 (2005)

Mansilla, S., **Bataller, M.**, Portugal, J.

Mitotic catastrophe as a consequence of chemotherapy.

Anticancer Agents Med. Chem. 6, 589-602 (2006)

Mansilla, S., Rojas, M., **Bataller, M.**, Priebe, W., Portugal, J.

Circumvention of the multidrug-resistance protein (MRP-1) by an antitumour drug through specific inhibition of gene transcription in breast tumor cells.

Biochem. Pharmacol. 7, 934-942 (2007)

Bataller, M., Méndez, C., Salas, J.A., Portugal, J.

Mithramycin SK modulates polyploidy and cell death in colon carcinoma cells.

Mol. Cancer Ther. 9, 2988-2897 (2008)

Mansilla, S., **Bataller, M.**, Portugal, J.

A nuclear budding mechanism in transiently arrested cells generates drug-sensitive and drug-resistant cells.

Biochem. Pharmacol. 78, 123-132 (2009)

Portugal, J., Mansilla, S., **Bataller, M.**

Mechanisms of drug-induced mitotic catastrophe in cancer cells

Curr. Pharm. Des. –en premsa- (2009)

Bataller, M., Méndez, C., Salas, J.A., Portugal, J.

Apoptosis in p21^{WAF1}-deficient human colon carcinoma cells is stimulated by mithramycin SK.

Biochem. Pharmacol. –en revisió- (2009)
