

CIENCIAS DEL MAR

**PROGRAMA DE ESPECIALIZACIÓN
Y DOCTORADO**

TESIS DOCTORAL

TITULO

**Spatial Objective Analysis of
Oceanographic Variables. An
Application to the Ebro Delta
Shelf/Slope Domain (North-
western Mediterranean) .**

AUTOR

Oc. Angélica de León Arteaga

DIRECTORES

Dr. Damià Gómis Bosch

Dr. Marc Antoni García López

FECHA

19 de Julio de 2002

Acknowledgments

My thanks to all the people that labour in the following institutions, whose hard work, collaboration and expertise definitely contributed to the termination of this work.

The Mexican “Consejo Nacional de Ciencia y Tecnología” (CONACyT) has provided me with several scholarships throughout my academic life.

To the Laboratorio de Ingeniería Marítima (LIM,) within the UPC, where this work was developed.

The knowledge and support of Dr. Damià Gómis Bosch and Dr. Marc Antoni García López have been extremely important. Damià has intensively walked with me during these last months.... Moltes gràcies per tot.

To the Departamento de Física Aplicada, within the UPC, for their academic stimulus.

To Isabel Sagués and all the persons in Tercer Ciclo.

Last, but not least, to Dr. Jose Manuel Redondo, who opened for me the door to another room, showing me its turbulent contents with utmost and contagious delight.

To...

Pablo, for we have walked together in many adventures. I do thank life for your company, I do thank you for who you are and for the way I feel when we are together.

Marina, our precious little girl, for you have greatly encouraged my knowledge about myself....

as an instinctive creature, responding to the impulses of motherhood;

as a heart that wonders and delights in your life;

as a woman, sharing the atavistic language common to all the women that have cradled a little baby in their arms, within their hearts, in our souls.

May you grow in the wisdom of the untamed.

May you grow in accordance to your own self.

And also to.....

My very large family, for they are absolutely fantastic in their great diversity.

All my friends, those sisters and brothers that life has given me, for their smiles and good company have filled me with joy, and their hearts and homes have been opened whenever we have needed them. Needless to say I can not mention all of them but

Arturo, Marisa and the Bigorra clan, for they opened the doors of their world, sharing with us stories and places only known to those that have grown in these domains.

All the LIM's and Física Aplicada's gangs, for we have spent fantastic moments together within the simple - every day - moments of life.

Josema and Carmen, for their human warmth and for their help when our little Marina appeared in our lives for, like the magicians that pull numberless rabbits from their hats, many baby things suddenly appeared from their home.

The Mexican "raza" for we have remembered together our land with delicious meals, beers, songs, "albures", jokes and tequila. Among them, Alex has been our closest friend, and we have spent many good, and some times not so good, times together. When Mari Carme arrived into his life, we also arrived into hers, and they have become a beautiful part of ours.

To all those persons that have showed us their land in such a way that it has also become a bit ours.

Finally, my deepest gratitude to two dear persons that now live in the world of the spirits (if it exists). One is my father, who took care of us in his own way. The other one is my good friend and professor Pedro... Perhaps Death became curious about the secrets of the ocean, and decided to look for an enthusiastic teacher.

Ha llegado el momento de hacer el honor a un poco de música y poesía, o más bien al músico y al poeta, que con gracia ha logrado plasmar los hondos sentimientos que se tienen al escribir una tesis de doctorado.

La verdad es que no se bajo qué circunstancias Oscar Chávez compuso esta canción, a lo mejor estaba en el proceso de terminar su tesis.... ¡¡ vaya usted a saber !!.

POR TÍ

*POR TI,
YO DEJE DE PENSAR EN EL MAR
POR TI,
YO DEJE DE FIJARME EN EL CIELO
POR TI,
ME HA DADO POR LLORAR COMO EL MAR
ME HE PUESTO A SOLLOZAR COMO EL CIELO
ME HA DADO POR LLORAR.*

*POR TI,
LA TERNURA SE NIEGA CONMIGO
POR TI,
LA AMARGURA ME SIGUE Y LA SIGO
POR TI,
ME ESTOY VOLVIENDO LOCO DE SUEÑO*
SE VUELVEN CONTRA MI MIS ANHELOS
SE VUELVEN CONTRA MI.*

*POR TI,
LA VIDA SE ME HA VUELTO UN INFIERNO
POR TI,
ESTOY MUERTO DE ANGUSTIA**, TAN ENFERMO
POR TI,
SE HAN VUELTO LLAGA EL SOL Y EL DOLOR
SE HAN VUELTO MAL LA FLOR Y EL AMOR
SE HA VUELTO MAL LA FLOR.*

*POR TI,
EL MAR ES LA LOCURA DEL CIELO
POR TI,
EL LLANTO ES UNA LLAGA DE CELOS
POR TI,
EL DOLOR ES EL SOL SIN LA FLOR
ESTE TEXTO*** ES DOLOR** TAN ETERNO
ESTE TEXTO ES DOLOR*****

*POR TI,
POR TI,
POR TI,
POR TI.*

*CELOS, **AMOR, ***INFIERNO, **** EL INFIERNO ES AMOR

*El meu amic el mar
és l'immens bressol de tots els blaus
i en el seu va-i-ve de so i color
aprenc tot el que tinc.*

Lluís Llach
